A. NOTES TO THE FINANCIAL INFORMATION

A1. Basis of preparation and changes in accounting policies

a) Basis of preparation

This financial information for the quarter and year ended 31 March 2014 has been prepared in accordance with International Accounting Standard ("IAS") 34 "Interim Financial Reporting" issued by the International Accounting Standard Board ("IASB"), Rule 13.09(2)(a) of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited ("HK Listing Rules") and paragraph 9.22 of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad ("Bursa Securities").

This financial information should be read in conjunction with the annual financial statements for the year ended 31 March 2013, which were prepared in accordance with International Financial Reporting Standards ("IFRSs").

This financial information has not been audited.

b) Accounting policies

(i) New and amended standards adopted by the Group

- 1) Amendment to IAS 1 "Financial statement presentation" regarding other comprehensive income. The main change resulting from this amendment is a requirement for entities to group items presented in 'other comprehensive income' (OCI) on the basis of whether they are potentially reclassifiable to profit or loss subsequently (reclassification adjustments).
- 2) Amendment to IFRS 7 "Financial instruments: Disclosures", on asset and liability offsetting. The amendment requires new disclosure requirements which focus on quantitative information about recognised financial instruments that are offset in the statement of financial position, as well as those recognised financial instruments that are subject to master netting or similar arrangements irrespective of whether they are offset.
- 3) IFRS 10 "Consolidated financial statements" builds on existing principles by identifying the concept of control as the determining factor in whether an entity should be included within the consolidated financial statements of the parent company. The standard provides additional guidance to assist in the determination of control where this is difficult to assess.
- 4) IFRS 11 "Joint arrangements" focuses on the rights and obligations of the parties to the arrangement rather than its legal form. There are two types of joint arrangements: joint operations and joint ventures. Joint operations arise where the investors have rights to the assets and obligations for the liabilities of an arrangement. A joint operator accounts for its share of the assets, liabilities, revenue and expenses. Joint ventures arise where the investors have rights to the net assets of the arrangement; joint ventures are accounted for under the equity method. Proportional consolidation of joint arrangements is no longer permitted.
- 5) IFRS 12 "Disclosures of interests in other entities" includes the disclosure requirements for all forms of interests in other entities, including joint arrangements, associates, structured entities and other off balance sheet vehicles.
- 6) IFRS 13 "Fair value measurement" aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRSs. The requirements, which are largely aligned between IFRSs and US GAAP, do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards within IFRSs.

- b) Accounting policies (Continued)
 - (i) New and amended standards adopted by the Group (Continued)
 - 7) IAS 19 (revised) "Employee benefits" amends the accounting for employment benefits. The Group has applied the standard retrospectively in accordance with the transition provisions of the standard. The impact on the Group has been in the following areas:

The standard replaces the interest cost on the defined benefit obligation and the expected return on plan assets with a net interest cost based on the net defined benefit asset or liability and the discount rate, measured at the beginning of the year. There is no change to determining the discount rate; this continues to reflect the yield on high-quality corporate bonds. This has increased the consolidated income statement charge as the discount rate applied to assets is lower than the expected return on assets. This has no effect on total comprehensive income as the increased charge in profit or loss is offset by a credit in other comprehensive income. The change has resulted in an increase in the consolidated income statement charge for the year ended 31 March 2013 of US\$307,000. The amendments have been applied retrospectively with comparative figures adjusted accordingly.

	As reported US\$'000	Adjustment US\$'000	Restated US\$'000
For the year ended 31 March 2013:			
Consolidated income statement			
Employee benefit expense	(116,927)	(307)	(117,234)
Profit before tax	77,401	(307)	77,094
Profit for the year	58,276	(307)	57,969
Basic earnings per share (US cents)	3.38	(0.02)	3.36
Consolidated statement of comprehensiv	ve income		
Actuarial losses of defined benefit plan assets	(141)	141	-
Actuarial gains of long service payment obligations	79	(79)	-
Remeasurements of post-employment benefit obligations	-	245	245
Other comprehensive losses for the year, net of tax	(2,020)	307	(1,713)

There is a new term "remeasurements". This is made up of actuarial gains and losses, the difference between actual investment returns and the return implied by the net interest cost.

The standard requires remeasurements to be recognised in retained earnings or a separate reserve. The Group has elected to recognise the remeasurements in retained earnings, resulting in increases of US\$2,573,000 and US\$2,639,000 in other reserves with corresponding decreases in the retained earnings as at 1 April 2012 and 1 April 2013 respectively.

Other than as disclosed above, there are no IFRSs or International Financial Reporting Interpretations Committee ("IFRIC") interpretations that are effective for the first time for the financial year beginning on 1 April 2013 that have a material impact on the Group.

(ii) New accounting standards, amendments to standards and interpretations to existing standards that are not yet effective and have not been early adopted by the Group

A number of new standards and amendments to standards and interpretations are effective for annual periods beginning after 1 April 2013, and have not been applied in preparing these consolidated financial statements. None of these is expected to have a significant effect on the consolidated financial statements of the Group, except the following set out below:

c) Functional currency and translation to presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates, i.e. the functional currency. The functional currency of the Company is RM. However, each entity within the Group can present its financial statements in any currency, which can be the same or different from the entity's functional currency. As the Group operates internationally, management considers that it is more appropriate to use US\$, a globally recognised currency, as the presentation currency for the Group's consolidated financial statements. For the entity whose functional currency is not the presentation currency, i.e. US\$, its results and financial position have been translated into US\$.

A2. Auditor's report on preceding annual financial statements

The auditor's report of the Group's annual financial statements for the year ended 31 March 2013 was not subject to any qualification.

A3. Seasonal or cyclical factors

The business operations of the Group may be affected by major festive seasons or major events that may increase or decrease the advertising expenditure and the travel business revenue.

A4. <u>Unusual item</u>

There were no unusual items affecting the Group's assets, liabilities, equity, net income or cash flows during the quarter under review.

A5. Changes in estimates

There were no material changes in estimates of amounts reported in prior financial years that have a material effect on the results of the current quarter under review.

A6. Changes in debt and equity securities

a) In August 2013, the Company repurchased a total of 1,000 of its listed shares on The Stock Exchange of Hong Kong Limited from the open market at the price of HK\$2.90 per share for the purpose of validating the declaration of solvency in relation to the share buyback mandate in accordance with the provision of the Malaysian Companies Act. The repurchase was financed by internally generated funds. Details of the repurchase are summarised as follows:

		(Unaudited)				
Month/Year	Number of ordinary shares repurchased	Purchase p shar Highest HK\$		Aggregate purchase consideration HK\$	Equivalents in US\$	
August 2013	1,000	2.90	2.90	2,900	374	

All the shares repurchased during the year ended 31 March 2014 were cancelled. Accordingly, the issued share capital of the Company was reduced by the par value of the repurchased shares and the premiums paid on these shares were charged against the share premium account. An amount equivalent to the par value of the shares cancelled was transferred from the Company's retained earnings to the capital redemption reserve.

Save as disclosed above, neither the Company nor any of its subsidiaries had purchased, sold or the Company had redeemed any of the Company's listed securities during the year ended 31 March 2014.

b) Details of the movements in the Company's shares during the year ended 31 March 2014 are as follows:

A. NOTES TO THE FINANCIAL INFORMATION (Continued)

A8. Turnover and segment information

The Group has determined the operating segments based on the reports that are reviewed and used by the Group Executive Committee for making strategic decisions.

The Group is organised operationally on a worldwide basis in four major operating segments:

Publishing and printing: Malaysia and other Southeast Asian countries

Publishing and printing: Hong Kong and Mainland China

Publishing and printing: North America

Travel and travel related services

Publishing and printing segments are engaged in the publication, printing and distribution of newspapers, magazines, digital contents and books primarily in Chinese language. The segments derive revenue mainly from advertising and sales of newspapers and magazines. Travel and travel related services segment derives revenue from the sale of travel packages and provision of tour services.

The Group Executive Committee assesses the performance of the operating segments based on a measure of segment profit before income tax as per the internal financial report. Other information provided is measured in a manner consistent with that in the internal financial report.

The Group's turnover and results for the quarter ended 31 March 2014, analysed by operating segment, are as follows:

EBITDA	17,066	23,402	86,343	89,783	

The Group's turnover for the three months ended 31 March 2014 was US\$99,609,000, reflecting a 9.5% decline from US\$110,093,000 in the corresponding quarter last year.

Profit before income tax fell by 28.5% to US\$12,993,000 from US\$18,166,000 in the year-ago quarter. The decline in profit was mainly attributed to the decrease in revenue, offset in part by lower operating expenses incurred during the quarter.

EBITDA for the quarter was US\$17,066,000, a 27.1% decrease when compared with US\$23,402,000 for the same quarter last year.

The Group's publishing and printing segment reported a turnover and profit before income tax of US\$87,822,000 and US\$15,613,000 in the fourth quarter of 2013/2014 respectively, as against US\$97,392,000 and US\$19,572,000 in the same quarter last year.

During the current quarter, turnover from the Group's Malaysian operations decreased by 11.3% to US\$65,859,000 from US\$74,242,000 in the fourth quarter of 2012/2013. Unlike last year when there was a spate of political advertisements in relation to the general election, the current quarter saw a normalcy in advertising spending. Adding to this, the MH370 incident and weak consumer spending arising from the government's subsidies rationalisation plan also contributed to a softer revenue in the current quarter. Profit before income tax from this segment was down by 19.0% to US\$15,149,000 from US\$18,713,000 in the year-ago quarter. The weaker Malaysian Ringgit also had an adverse impact on this segment's results. In Malaysian Ringgit, turnover and profit before income tax fell by 5.0% and 11.8% respectively.

Due to the intensified market competition and slowing economy, turnover for the Group's operations in Hong Kong and Mainland China registered a drop of 3.8% to US\$15,487,000. The segment's profit before income tax for the quarter was US\$13,000 compared with US\$820,000 in the same quarter last year. The decrease was mainly due to the inclusion in last year of a gain on disposal of subsidiaries of US\$1,243,000.

Turnover for the North America segment during the quarter under review was US\$6,476,000, a decrease of 8.1% or US\$573,000 from US\$7,049,000 a year earlier. The decrease was mainly caused by a negative currency impact on the Canadian operations' turnover. Despite the decline in revenue, the segment managed to improve its performance through cost-optimisation. Profit before income tax for the segment amounted to US\$451,000, a growth of US\$412,000 as compared with US\$39,000 in the same quarter last year.

The travel segment's turnover declined 7.2% or US\$914,000 to US\$11,787,000, and loss before income tax of the segment amounted to US\$542,000 as against a loss of US\$230,000 in the year-ago quarter. Apart from the fourth quarter being traditionally a low travel season, the timing of the Easter holidays, which fell in April instead of March in 2014, also impacted the Group's travel business as this is one of the peak travel times of the year.

B1. Analysis of performance (Continued)

For the year ended 31 March 2014, the Group reported a turnover of US\$468,728,000, a marginal decrease of 1.9% when compared with the previous year's turnover of US\$477,853,000. Profit before income tax for the current year declined 11.1% to US\$68,563,000 from last year's US\$77,094,000.

Both Malaysian Ringgit and Canadian dollar weakened against US dollar during the quarter as well as the financial year under review, resulting in negative currency impact on the Group's revenue and profit before income tax of approximately US\$5,251,000 and US\$1,158,000, respectively, for the quarter and US\$11,441,000 and US\$2,444,000, respectively, for the year ended 31 March 2014.

Turnover	99,609	117,332	-15.1%
Profit before income tax	12,993	19,920	-34.8%

Being a traditionally quiet season, the fourth quarter delivered lower results than the immediate preceding quarter. For the quarter under review, the Group's turnover and profit before income tax dropped 15.1% and 34.8% respectively from those reported in the immediate preceding quarter.

B3. Prospects for 2014/2015

We expect the business environment to be tough and challenging in the next financial year in the wake of economic uncertainties and intensified competition in the Group's major markets.

Although newsprint prices are expected to remain stable, the Group foresees a weaker than usual advertising business environment since both consumers and businesses are likely to stay cautious with their spending.

Despite the satisfactory results of the travel segment during the current year, the Group anticipates fierce competition from its competitors in the higher margin sections and the increasing airline capacity among most of the major carriers.

Nevertheless, the Group will continue to reinforce its business strategies to enhance productivity and profitability whilst implementing rigid discipline in cost containment.

B4. Profit forecast and profit guarantee

The Group has not provided any profit forecast or profit guarantee in any public document.
